# 1. Identification

| Product identifier              | Bismuth Alloys  |
|---------------------------------|---|
| Other means of identification   |   |
| SDS number                      | 111   |
| Product code                    | C89320, C89325, C89510, C89360, C89510, C89520, C89530, C89831, C89833, C89835,<br>C89836, C89837 |
| Recommended use                 | Manufacturing   |
| Recommended restrictions        | Not assigned.   |
| Manufacturer / Importer / Suppl | ier / Distributor information   |
| Company name                    | United Bronze of Pittsburgh Inc.  |
| Address                         | P. O. Box 317, Creighton, PA 15030  |
| Telephone                       | 724-226-8500  |
| Contact person                  | Bob Orringer  |
| E-mail                          | bronze713@aol.com   |
| Emergency phone number          | 724-226-8500  |

# 2. Hazard(s) identification

| Physical hazards | Not classified.                                   |                   |
|------------------|---|-------------------|
| Health hazards   | Sensitization, skin                               | Category 1        |
|                  | Carcinogenicity                                   | Category 2        |
|                  | Specific target organ toxicity, repeated exposure | Category 2 (Lung) |
| OSHA hazard(s)   | Not classified.                                   |                   |

Label elements

Hazard symbol

| Signal word                                  | Warning  |
|--|--|
| Hazard statement                             | May cause an allergic skin reaction. Suspected of causing cancer. May cause damage to organs (Lung) through prolonged or repeated exposure by inhalation.  |
| Precautionary statement                      |  |
| Prevention                                   | Obtain special instructions before use. Do not handle until all safety precautions have been read<br>and understood. Use personal protective equipment as required. Contaminated work clothing<br>should not be allowed out of the workplace. Wear protective gloves/protective clothing. Do not<br>breathe fumes and dusts. |
| Response                                     | If on skin: Wash with plenty of soap and water. If skin irritation or rash occurs: Get medical advice/attention. Specific treatment (see this label). Wash contaminated clothing before reuse. If exposed or concerned: Get medical advice/attention. Get medical advice/attention if you feel unwell.                       |
| Storage                                      | Store locked up.   |
| Disposal                                     | Dispose of contents/container to a facility that has permission of disposing the industrial waste.   |
| Hazard(s) not otherwise<br>classified (HNOC) | Not classified.  |

# 3. Composition/information on ingredients

### Mixture

| Hazardous components<br>Chemical name | Common name and<br>synonyms | CAS number | %     |
|---------------------------------------|-----------------------------|------------|-------|
| Copper                                |                             | 7440-50-8  | 85-91 |
| Tin                                   |                             | 7440-31-5  | 4-7.5 |

| Chemical name  | Common name and<br>synonyms   | CAS number   | %   |
|--|---|--|---|
| Bismuth  |   | 7440-69-9  | 0.5-6                                       |
| Selenium   |   | 7782-49-2  | 0-1.1                                       |
| Nickel   |   | 7440-02-0  | 0-1   |
| Composition comments   | All concentrations are in percent by weight un<br>percent by volume. The alloy contains addition<br>disclosure requirements. At temperatures abo<br>containing oxides of alloying elements.   | nal alloying elements at conc  | centrations below                           |
| 4. First-aid measures  |   |  |   |
| nhalation  | In case of exposure to fumes or particulates: I persists.   | Move to fresh air. Get medica  | al attention if discor                      |
| Skin contact   | Contact with dust: Wash skin with soap and w<br>disorders: Seek medical attention and bring al<br>molten product, cool rapidly with water and se<br>remove molten product from skin because ski<br>treated promptly with thorough cleansing of th | long these instructions. In ca<br>ek immediate medical attent<br>n will tear easily. Cuts or abr | se of contact with h<br>ion. Do not attempt |
| Eye contact  | Do not rub eyes. Remove any contact lenses.<br>rinse under eyelids. If irritation persists, contin<br>under eyelids. If discomfort continues, consul  | ue flushing for 15 minutes, r  |   |
| ngestion   | Rinse mouth thoroughly if dust is ingested. Or personnel. Get medical attention if any discor   |  | truction of medical                         |
| Most important<br>symptoms/effects, acute and<br>delayed                     | May cause skin and eye irritation. May cause of breath. Wheezing. Sensitization.  | irritation to mucous membra  | nes. Cough. Shorti                          |
| Indication of immediate<br>medical attention and special<br>treatment needed | Treat symptomatically. Symptoms may be del  | layed.   |   |
| General information  | Get medical attention if any discomfort develo<br>how minor they may seem. Show this safety of  |  |   |
| 5. Fire-fighting measures  |   |  |   |
| Suitable extinguishing media   | Special powder against metal fires. Dry sand.   |  |   |
| Unsuitable extinguishing<br>nedia  | Do not use water or halogenated extinguishing<br>Explosion hazard could result.   | g media. Do not use water o  | n molten metal:                             |
| Specific hazards arising from the chemical                                   | During fire, gases hazardous to health may be<br>finely divided metallic dust or powder may form<br>form nickel carbonyl, a highly toxic substance  | m an explosive mixture with a  |   |
| Special protective equipment<br>and precautions for firefighters             | Self-contained breathing apparatus and full pr<br>Selection of respiratory protection for firefighti<br>the workplace.  |  |   |
| Fire-fighting<br>equipment/instructions                                      | Move containers from fire area if you can do i  | t without risk.  |   |
| 6. Accidental release meas   | sures   |  |   |
| Personal precautions,<br>protective equipment and<br>emergency procedures    | Ensure adequate ventilation. Avoid inhalation protective clothing as described in Section 8 of  |  | and eyes. Wear                              |
| Methods and materials for<br>containment and cleaning up                     | Avoid dust formation. Allow spilled material to<br>container for recycle or disposal. Collect dust<br>The vacuum cleaner should be explosion-proc<br>collected with shovel, broom or the like. This r<br>hazardous waste.                         | using a vacuum cleaner equ<br>ofed. If not possible, gently m                                    | ipped with HEPA fil<br>noisten dust before  |
| Environmental precautions  | Avoid release to the environment. Do not con  | taminate water.  |   |

# 7. Handling and storage

### Precautions for safe handling

Welding, burning, sawing, brazing, grinding or machining operations may generate fumes and dusts of metal oxides. Provide adequate ventilation. Avoid contact with sharp edges and hot surfaces. Avoid inhalation of dust and contact with skin and eyes. Avoid generation and spreading of dust and fumes. Avoid contact with hot or molten material. Dust clouds may be explosive under certain conditions. Take precautionary measures against static discharges when there is a risk of dust explosion. Use explosion-proof electrical equipment if airborne dust levels are high. To prevent and minimize fire or explosion risk from static accumulation and discharge, effectively bond and/or ground product transfer system. Wear appropriate personal protective equipment. Do not use water on molten metal. Do not eat, drink or smoke when using the product. Keep the workplace clean. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

### 8. Exposure controls/personal protection

#### **Occupational exposure limits**

#### US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Keep dry. Store away from incompatible materials.

| Components                    | Туре  | Value  | Form   |

| Other                         | Wear suitable protective clothing.  |  |  |
| Respiratory protection        | In case of inadequate ventilation or r<br>with particle filter. When engineering  | controls are not sufficient to lo  | wer exposure levels below                              |
|                               | applicable exposure limit, use a NIO<br>program that meets OSHA's 29 CFR<br>whenever work place conditions war  | 1910.134 and ANSI Z88.2 req  | uirements must be followed                             |

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated uniforms should be laundered separately from other clothing to prevent potential cross-contamination. If possible, an industrial laundry service should be used to eliminate the possibility of contaminating the home environment. Handle in accordance with good industrial hygiene and safety practices. Observe any medical surveillance requirements.

### 9. Physical and chemical properties

| Appearance                                 | Shapes, Solids, Tubes & Turnings.  |

| Physical state                             | Solid.   |
| Form                                       | Shapes, Solids, Tubes & Turnings.  |
| Color                                      | Yellow to red.   |
| Odor                                       | None.  |
| Odor threshold                             | Not available.   |
| рН   | Unknown.   |
| Melting point/freezing point               | 1725.8 °F (941 °C)   |
| Initial boiling point and boiling range    | Not available.   |
| Flash point                                | Not available.   |
| Evaporation rate                           | Not available.   |
| Flammability (solid, gas)                  | Not applicable.  |
| Upper/lower flammability or exp            | losive limits  |
| Flammability limit - lower<br>(%)          | Not available.   |
| Flammability limit - upper<br>(%)          | Not available.   |
| Explosive limit - lower (%)                | Not available.   |
| Explosive limit - upper (%)                | Not available.   |
| Vapor pressure                             | Not available.   |
| Vapor density                              | Not available.   |
| Relative density                           | Not available.   |
| Solubility(ies)                            | Insoluble in water.  |
| Partition coefficient<br>(n-octanol/water) | Not available.   |
| Auto-ignition temperature                  | Not available.   |
| Decomposition temperature                  | Not available.   |
| Viscosity                                  | Not available.   |
| Other information                          |  |
| Bulk density                               | 0.313 - 0.323 lb/in³   |
| 10. Stability and reactivity               |  |
| Reactivity                                 | Not available.   |
| Chemical stability                         | Stable at normal conditions. Massive metal is stable and non reactive under normal conditions of use, storage and transport.   |
| Possibility of hazardous<br>reactions      | Hazardous polymerization does not occur. Hot molten material will react violently with water resulting in spattering and fuming.   |
| Conditions to avoid                        | Contact with incompatible materials. Contact with acids will release flammable hydrogen gas.<br>Avoid dust formation. Dust clouds may be explosive under certain conditions. |
| Incompatible materials                     | Acids. Ammonium nitrate. Fluoride. Halogens. Nitrates. Phosphorus. Strong oxidizing agents. Sulfur.  |
| Hazardous decomposition<br>products        | Welding, burning, sawing, brazing, grinding or machining operations may generate dusts and fumes of metal oxides. Phosphorus oxides. Selenium/selenium oxides.               |
| 11. Toxicological informat                 | ion  |

# 11. Toxicological information

### Information on likely routes of exposure

Ingestion Not relevant, due to the form of the product. However, ingestion of dusts generated during working operations may cause nausea and vomiting.

| Inhalation  | Elevated temperatures or mechanical action may form dust and fumes which may be irritating to the mucous membranes and respiratory tract. In sensitized individuals, exposure causes an asthma-like attack, with wheezing, bronchospasm, and dyspnea.  |
|---|--|
| Skin contact  | May cause an allergic skin reaction. Hot or molten material may produce thermal burns. Workers allergic to nickel may develop eczema or rashes. Acute exposure to cobalt metal, dust, and fume may cause irritation of skin and eyes. In sensitized individuals, exposure causes an asthma-like attack, with wheezing, bronchospasm, and dyspnea.  |
| Eye contact   | Molten material will produce thermal burns. Elevated temperatures or mechanical action may form dust and fumes which may be irritating to the eye.   |
| Symptoms related to the physical, chemical and toxicological characteristics  | May cause irritation to mucous membranes. May cause skin and eye irritation. Coughing. Wheezing. Shortness of breath. Sensitization.   |
| Information on toxicological effe   | ects   |
| Acute toxicity  | High concentrations of freshly formed fumes/dusts of metal oxides can produce symptoms of metal fume fever. Acute exposure to dust, and fume may cause irritation of skin and eyes. In sensitized individuals, exposure causes an asthma-like attack, with wheezing, bronchospasm, and dyspnea.  |
| Skin corrosion/irritation   | Elevated temperatures or mechanical action may form dust and fumes which may be irritating to the eye, mucous membranes and respiratory tract. Hot or molten material may produce thermal burns.   |
| Serious eye damage/eye irritation   | Dust from machining operation in the eyes may cause irritation.  |
| Respiratory sensitization   | Not classified.  |
| Skin sensitization  | Frequent or prolonged contact may defat and dry the skin, leading to discomfort and dermatitis.<br>May cause sensitization by skin contact. Pre-existing skin conditions including dermatitis might be<br>aggravated by exposure to this product.  |
| Germ cell mutagenicity  | No data available.   |
| Carcinogenicity   | Suspected of causing cancer.   |
| IARC Monographs. Overall  | Evaluation of Carcinogenicity  |
| Nickel (CAS 7440-02-0)<br>Selenium (CAS 7782-49-<br>NTP Report on Carcinogens |  |
| Nickel (CAS 7440-02-0)  | Known To Be Human Carcinogen.<br>Reasonably Anticipated to be a Human Carcinogen.  |
| Reproductive toxicity   | Nickel: Has shown teratogenic effects in laboratory animals.   |
| Specific target organ toxicity - single exposure                              | May cause respiratory irritation.  |
| Specific target organ toxicity - repeated exposure                            | Causes damage to the following organs through prolonged or repeated exposure: Lung.  |
| Aspiration hazard   | Not available.   |
| Chronic effects   | Harmful: danger of serious damage to health by prolonged exposure through inhalation. Chronic inhalation of high concentrations of iron oxide fumes or dust may lead to benign pneumoconiosis (siderosis). Prolonged and repeated overexposure to dust and fumes can lead to benign pneumoconiosis (stannosis). Chronic inhalation of metallic oxide dust/fume may cause metal fume fever. |
| Further information   | Welding or plasma arc cutting of metal and alloys can generate ozone, nitric oxides and ultraviolet radiation. Ozone overexposure may result in mucous membrane irritation or pulmonary discomfort. UV radiation can cause skin erythema and welders flash.  |
| 12. Ecological information  | 1  |
| Ecotoxicity   | Alloys in massive forms present a limited hazard for the environment. The product contains a substance which may cause long-term adverse effects in the environment.   |
| Components  | Species Test Results   |
| Selenium (CAS 7782-49-2)  |  |
| Aquatic   |  |
| Fish  | LC50 Fathead minnow (Pimephales promelas) 0.94 - 1.2 mg/l, 96 hours  |
| Persistence and degradability   | The product is not biodegradable.  |
| Bioaccumulative potential   | The product contains potentially bioaccumulating substances.   |
| Mobility in soil  | Alloys in massive forms are not mobile in the environment.   |
| Mobility in general   | Alloys in massive forms are not mobile in the environment.   |
| Other adverse effects   | An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.  |
|   |  |

### 13. Disposal considerations

| Disposal instructions  | This material and its container must be disposed of as hazardous waste. Dispose in accordance with all applicable regulations.   |
|--|--|
| Local disposal regulations   | Dispose in accordance with all applicable regulations.   |
| Hazardous waste code   | Z110: Inorganic compounds n.o.s.   |
| Waste from residues / unused<br>products<br>Contaminated packaging | Recover and recycle, if practical. Solid metal and alloys in the form of particles may be reactive.<br>Its hazardous characteristics, including fire and explosion, should be determined prior to disposal.<br>Not applicable. |
|  |  |

# 14. Transport information

#### DOT

Not regulated as a hazardous material by DOT.

#### ΙΑΤΑ

Not regulated as a dangerous good.

#### IMDG

Not regulated as a dangerous good.

Transport in bulk according to No information available. Annex II of MARPOL 73/78 and the IBC Code

### 15. Regulatory information

| US federal regulations | This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication |
